SUMMARY

Marketing operations and automation specialist with around five years of experience running paid campaigns and building the systems behind them: conversion tracking with GTM and GA4 that ties ad spend to real bookings, automated reporting, and Apps Script and n8n workflows that turn multi-hour manual jobs into seconds. I focus on building the operational machine, not only running the campaigns.

SKILLS

Marketing operations & automation: HubSpot, n8n, Workflow automation, Google Apps Script, Google Sheets, Google Forms, marketing calendars, process documentation, process improvement

Measurement, analytics & reporting: Google Tag Manager, GA4, Power BI, conversion tracking, KPI and dashboard reporting, campaign performance analysis

Paid media & campaigns: Meta Ads, Google Ads, budget management, campaign optimisation, cross-channel expansion

AI-assisted workflows: AI agents, AI content systems, ChatGPT, Claude, Gemini, Kimi AI

Project & team leadership: Cross-functional coordination, team lead, training and onboarding, Asana

WORK EXPERIENCE

pm2am Trips GmbH & Co. KG, Wuppertal, Germany

April 2022 - Present

Marketing Operations & Project Manager

- Own marketing operations and automation in a cross-functional role covering campaign management, measurement, reporting and internal tooling.
- Designed and built automation systems in Google Apps Script, Sheets, Forms and n8n that eliminated repetitive manual work, cutting a recurring multi-hour process to seconds and producing standardised, partner-ready outputs.
- Built conversion-tracking and measurement infrastructure with Google Tag Manager and GA4, closing the loop from ad click to booking so campaigns could be optimised on outcomes instead of clicks.
- Improved paid campaign efficiency year over year, tracked in a custom reporting dashboard: daily link clicks +39.1%, link CTR +64.3%, CPC -20.1%.
- Created and maintained automated content and campaign calendars to plan timelines, track deadlines and keep output consistent across channels.
- Manage Meta Ads and Google Ads end to end (setup, budgeting, optimisation, reporting) and expanded the channel mix from mainly Meta Ads to include Google Ads for search-intent coverage.
- Delivered 60 to 85 marketing campaigns per year and trained 25 to 35 interns over five years, leading a cross-functional team of 3 to 6 with documented processes.

pm2am Trips GmbH & Co. KG, Wuppertal, Germany

Oct 2021 - Mar 2022

Social Media Marketing & Travel Coordination Intern

- Supported campaign tracking, content updates and promotional material preparation across social and paid channels.
- Researched competitors, customer demand and market trends to support campaign planning and positioning.
- Assisted with customer communication and pre-trip updates, ensuring accurate information before departure.

KEY PROJECTS

Click-to-booking conversion tracking

Google Tag Manager, GA4, Google Ads

- Built conversion tracking from scratch after years of paid campaigns running with no booking visibility.
- Created the tracking plan and coordinated GTM deployment with an external IT partner, then built 8 custom GA4 events from navigation to booking completion.
- Delivered full funnel visibility and fed conversion data back into Meta and Google Ads for outcome-based bidding.

Marketing automation engine: self-updating 60-day content system

Google Apps Script, n8n, Asana

- Built a content operations system that pulls campaigns, calculates priority scores and generates a rolling 60-day calendar with anti-repetition rules.
- Pushed AI-generated briefs (hook, caption, CTA and asset notes) to Asana automatically.
- Core logic in Google Apps Script with the full architecture designed for n8n; reduced recurring planning from hours to seconds.

Operational data pipeline: participant and resource allocation

Google Apps Script, Google Sheets

- Replaced a manual, multi-step process with an Apps Script pipeline that ingests records, applies rule-based allocation logic and validates outputs.
- Generated partner-ready documents at the scale of 60 to 85 programmes per year.
- Core script around 800 lines; cut a recurring multi-hour task to seconds with zero manual reformatting.

CERTIFICATIONS & TRAINING

- **AI Agents for Marketing and Automation**, Princess Sumaya University for Technology (in progress)
- **Revenue Operations Certification**, HubSpot Academy (July 2026)
- **Reporting Certification**, HubSpot Academy (July 2026)
- **Google Data Analytics: Foundations, Data Preparation and Decision-Making**, Google (October 2025)
